

Responsible Care Activities

Basic Policy

We have established the following basic policy regarding the environment and safety.

1. We strive to preserve the environment by evaluating and reducing environmental impacts throughout the entire product lifecycle, from development to disposal.
2. We ensure the safety of the local community and employees by continuing accident-free and disaster-free operations.
3. We verify the safety of raw materials, intermediates, and products to prevent health damage to employees, logistics personnel, customers, general consumers, and other related parties.
4. In addition to complying with relevant laws and regulations, we strive for continuous environmental and safety improvements through voluntary management.

Action Policy

We have established the following action policy regarding the environment and safety.

1. We evaluate the impact of business activities on the environment and safety, establish environmental targets and occupational safety and health targets, review them periodically, and strive for continuous environmental conservation, occupational safety, and health activity improvements.
2. We comply with laws, regulations, and agreements related to the environment and occupational safety and health and strive to coexist with local communities.
3. To reduce environmental burdens, we engage in all business activities aimed at promoting resource saving, energy saving, waste reduction and recycling, and improving occupational safety and health.
4. In the development of products and technologies, we give consideration to the environment and safety, recognize the environmental impact of our products, and engage in business activities to provide safe products.
5. We conduct environment and safety education and internal public relations activities to ensure that all employees understand the environment and safety policy and to raise environment and safety awareness, while also requesting the understanding and cooperation of related cooperating companies.
